

# SECTION 9: CESSATION AND SUPPORT

Because nicotine dependence can start early in an adolescent's use of tobacco products, cessation resources should be offered to the student beginning at the first offense.

No one can be forced to quit. Quitting is a choice that must be made by a tobacco user, whether student or staff. Research has shown that most teen smokers do want to quit but have been unsuccessful in their previous attempts.

New methods of cessation support using media that youth use most often, like texting and the Internet, are now available. Online support, telephone counseling and text messages can all provide valuable support for teens who would like help with quitting.
